Nailrox® nail lacquer

What is this medicine?

Nailrox **Nail Lacquer** is an antifungal medication with an active ingredient ciclopirox. It is used in the treatment of fungal skin and nail infections. It works by stopping the growth of fungi, thus treating the infection.

How should I use this medicine?

Nailrox **Nail Lacquer** is for external use only. You should use it in the dose and duration as directed by your doctor. The amount you need, and how long you take it will depend on what you are being treated for. You should normally wash and dry the affected area before applying a thin layer of the medicine. You should avoid getting in contact with your mouth, eyes, and nose. In case of accidental contact, wash it off with plenty of water. Keep using it regularly to get the most benefit. Before using Nailrox **Nail Lacquer**, clean and dry the affected area. Use it in the dose and duration as advised by your doctor. Check the label for directions before use. Trim your nails. Apply the medicine with applicator brush to the nail and its underside and let it dry for 30 seconds. Nailrox **Nail Lacquer** is effective if used in the dose and duration advised by your doctor. Do not stop taking it even if you see improvement in your condition. If you stop using Nailrox **Nail Lacquer** too early, the symptoms may return or worsen.

How this medicine works?

Nailrox **Nail Lacquer** is used to treat skin infections caused by fungi. It works by killing and stopping the growth of fungi. This provides relief from various symptoms, such as pain and itching, caused by the infection and speeds up the healing process. You should keep using it for as long as it is prescribed even if your symptoms have gone. This will prevent the infection from coming back. Using this medicine as prescribed may help you feel more comfortable with your skin. It stops protein production in the fungal cells disrupting the cell division process. This is how it prevents further growth of fungi and helps to treat your skin and nail infections.
