Clopidogrel tablet

What is this medicine?

CLOPIDOGREL helps to prevent blood clots. It reduces the chance of having a heart attack or a stroke in people who have already had a heart attack or a stroke. **Clopidogrel** can also decrease the chance of a heart attack or stroke in certain groups of people at high risk for these events.

What should my health care professional know before I take this medicine?

They need to know if you have any of the following conditions:

- bleeding disorder or hemophilia
- liver disease
- recent surgery or trauma
- stomach or intestinal ulcers
- an unusual or allergic reaction to **clopidogrel**, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Take **clopidogrel** tablets by mouth. Swallow the tablets with a drink of water. Do not take your medicine more often than directed.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
