Moxifloxacin Hydrochloride tablet

What is this medicine?

MOXIFLOXACIN is a quinolone antibiotic. It can kill bacteria or stop their growth. It is used to treat different kinds of infections, like skin and respiratory infections. It will not work for colds, flu, or other viral infections.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- cerebral disease
- heart condition
- liver disease
- seizures disorder
- an unusual or allergic reaction to moxifloxacin, other quinolone antibiotics, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. It can be taken with or without food. Take your medicine at regular intervals. Do not take your medicine more often than directed. Take all of your medicine as directed even if you think you are better. Do not skip doses or stop your medicine early.

Talk to your pediatrician regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
