Tranexamic Acid tablet

What is this medicine?

TRANEXAMIC ACID is an antifibrinolytic agent. It works by blocking the breakdown of blood clots.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- blood clots, bleeding within the brain
- eye problems
- colorblind
- kidney disease
- upper respiratory tract bleeding
- an unusual or allergic reaction to tranexamic acid, other medicines,
