Norethindrone tablet

What is this medicine?

NORETHINDRONE is a female hormone. This medicine is used to treat endometriosis, uterine bleeding caused by abnormal hormone levels, and secondary amenorrhea. Secondary amenorrhea is when a woman stops getting menstrual periods due to low levels of certain female hormones.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- blood vessel disease or blood clots
- breast, cervical, or vaginal cancer
- diabetes
- heart disease
- kidney disease
- liver disease
- mental depression
- migraine
- seizures
- stroke
- vaginal bleeding
- an unusual or allergic reaction to norethindrone, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding
