

Ferrogen XT®

Ferrogen XT® tablet contains Iron and Folic Acid (vitamin B9). Folic acid is essential to numerous bodily functions ranging from nucleotide biosynthesis to the remethylation of homocysteine. It is especially important during periods of rapid cell division and growth. Both children and adults require folic acid to produce healthy red blood cells and prevent anemia. Iron transports oxygen throughout the body and maintains red blood cells, thus making an individual feel energetic and preventing anemia. This product is often assigned during pregnancy.

Active ingredient: [Iron, Folic Acid](#)

Brand(s): Ferrogen XT

Manufacturer: Intas

Disease(s): Iron Deficiency Anemia / Anemias Of Nutritional Origin / Pregnancy / Infancy / Megaloblastic Anemias Due To A Deficiency Of Folic Acid / Folate Deficiency / Poor Absorption Of Food / Spina Bifida In An Unborn Fetus
