Super P Force Jelly ®

What is this product?

Super P Force Jelly ® - is the most popular form of release of Erectile Dysfunction medication, loved for a simple method of an intake. It allows any man to perform sexually for the extended period of time and to forget about problems with erection. It contains 2 active ingredients Sildenafil 100 mg + Dapoxetine 60 mg.

Dapoxetine is clinically proven and approved in many countries to treat premature ejaculation and allows intercourse to last longer.

Patients taking Super P-Force Oral Jelly can expect an effective treatment time of 4 - 6 hours. The active ingredients of Super P-Force Oral Jelly are Sildenafil Citrate and Dapoxetine. Sildenafil Citrate belongs to the PDE-5 family of vasodilators. These drugs work by dilating the blood vessels in the body; particularly around the genital area. This, in turn, allows stronger blood flow to enable an erection to take place.

Dapoxetine belongs to the family of (SSRI) serotonin reuptake inhibitors. It is the only drug with regulatory approval for treatment of premature ejaculation.

There are additional warnings and precautions when taking Super P-Force Oral Jelly. Please read the information below carefully.

How should I take this medicine?

To get the best from your treatment, please read the following carefully

The safe indicated dose of Super P-Force Oral Jelly within a 24 hour period is 100mg Sildenafil Citrate / 60mg Dapoxetine.

This medicine will become effective 1 hour after taking it and effects may become noticeable after 45mins.
