Azathioprine tablet

What is this medicine?

AZATHIOPRINE suppresses the immune system. It is used to prevent organ rejection after a transplant. It is also used to treat rheumatoid arthritis.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- infection
- kidney disease
- liver disease
- an unusual or allergic reaction to azathioprine, other medicines, lactose, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast feeding

How should I use this medicine?

Take this medicine by mouth with a full glass of water. Take your medicine at regular intervals. Do not take your medicine more often than directed. Continue to take your medicine even if you feel better. Do not stop taking except on your doctor's advice.

Talk to your pediatrician regarding the use of this medicine in children.
