Nortriptyline Hydrochloride tablet

What is this medicine?

NORTRIPTYLINE is used to treat depression.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- an alcohol problem
- bipolar disorder or schizophrenia
- difficulty passing urine, prostate trouble
- glaucoma
- heart disease or recent heart attack
- liver disease
- over active thyroid
- seizures
- thoughts or plans of suicide or a previous suicide attempt or family history of suicide attempt
- an unusual or allergic reaction to nortriptyline, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. Take your doses at regular intervals. Do not take it more often than directed. If you have been taking this medicine regularly for some time, do not suddenly stop taking it. You must gradually reduce the dose or you may get severe side effects. Ask your doctor or health care professional for advice. Even after you stop
