Norethindrone Acetate tablet

What is this medicine?

NORETHINDRONE ACETATE is a female hormone. This medicine is used to treat endometriosis, uterine bleeding caused by abnormal hormone levels, and secondary amenorrhea. Secondary amenorrhea is when a woman stops getting menstrual periods due to low levels of certain female hormones.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- blood vessel disease or blood clots
- breast, cervical, or vaginal cancer
- diabetes
- heart disease
- kidney disease
- liver disease
- mental depression
- migraine
- seizures
- stroke
- vaginal bleeding
- an unusual or allergic reaction to norethindrone, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. You may take this medicine with or without food. Take this medicine at the same time each day. Do not take your medicine more often than directed.

Talk to your pediatrician regarding the use of this medicine in children.

Special care may be needed.
