Customers rely on OpenEdge to be the most innovative, reliable, and affordable application development platform in the industry. With the OpenEdge 12 series you can build, scale and protect mission-critical business applications that are flexible enough to continuously grow with the business. Customers rely on OpenEdge to be the most innovative, reliable, and affordable application development platform in the industry. With the OpenEdge 12 series you can build, scale and protect mission-critical business applications that are flexible enough to continuously grow with the business. Set of standards-based routines, protocols, services and tools for building and integrating business applications Companion solutions such as Pro2 offer OpenEdge users easy access to OpenEdge applications while eliminating connectivity limitations and supporting uninterrupted business operations. Application security in OpenEdge provides additional security features such as a hardware security module, JSON web encryption and transparent data encryption to enhance application security. Bajo petición, Progress proporciona verificaciones de empleo a los empleados y a terceros.Solicitar verificación de empleo Vision Our vision is to propel business forward in a technology-driven world. Mission Our mission is to be the trusted provider of the best products to develop, deploy and manage responsible AI-powered applications and experiences. Progress AI products help customers accelerate their AI journeys by providing the software to build GenAI into their applications and to use AI-driven technologies to meet the needs of their business. AI can drive tremendous value, such as insights and efficiencies that translate into business success. Let us help you bring the benefits of responsible AI to your organization. AI presents a once-in-a-lifetime opportunity that's too important to ignore. While GenAI with Large Language Models (LLMs) is grabbing headlines, AI is much more than that. From RAG-based semantic AI to intelligent decisioning on the edge, and from predictive analytics to AIOps, Progress products enable customers to harness the power of AI-driven technology to elevate business effectiveness. We offer advanced AI capabilities that our customers love and are eager to use more. With AI, you can: From GenAI content creation and personalization to automated AI-powered threat detection, AI delivers timesaving efficiencies at a scale and magnitude not previously possible. Combine Large Language Models (LLMs) with semantic search of your own business data to generate GenAI outputs uniquely relevant to your business, with source attribution to engender trust. Take a human-in-the-loop (HITL) AI approach to reduce data bias and inaccuracies while producing clear, context-driven outcomes without sacrificing efficiency. AI propensity scoring empowers you to harness digital channels to personalize and reimagine customer interactions, gaining both agility and competitive advantage. Customers Improved Network Threat Response Times by 50% withProgress Flowmon Businesses need flexible solutions from a dependable provider, one with the products, vision and proven expertise to help them face their unique challenges. Here's why customers continue to turn to Progress. Leverage RAG and semantic analysis for automated hallucination-free GenAI responses. Apply your domain knowledge to your AI, helping to amplify human intelligence at machine scale. Augment GenAI with source attributions to engender trust in the generated responses. Get reliable and transparent AI capabilities from a company invested in your success. Rest easy using robust security measures to better protect sensitive data. Progress has a track record, proven over decades, of helping customers thrive in times of change, embracing new technologies to help customers reach their goals. Blog Blog Blog Get help with your Progress products from our community resources and technical team. The representative was very helpful and courteous. Our server was down and stress was high. As soon as I described what I saw in the log file, the representative immediately directed me to the solution, and I am very grateful.Chuck Henry Network Administrator, EBAA Iron Inc. The representative and team instantly responded. Our problem was solved in minutes.Bert Saper App Developer, Association of Legal Administrators The Support rep was willing to hop on a screen share and helped us arrive at a quick resolution of the issue!Ray Bodine Programmer & Developer, Liberty Bank Incredible handling of the key problem. Just a great session. Learned enough to save me days of time.Pat Schilling President, Tugboat Software We're here to help with all your Progress products. Build sophisticated, search-to-visualization data and analytics apps that tell complete stories. Build smart agents and conversational experiences into your intelligent applications. Accelerate time to insights and deliver data-driven applications in a fraction of the time. Progress® MarkLogic® FastTrack™ is an integrated React UI toolkit for Progress MarkLogic, designed to help developers and data users create scalable data exploration and analytics interfaces. Visualize connections in your data the way no other tool can. A comprehensive set of data visualization techniques works with all your data to build visually rich, qualitative narratives. No lost context. No complex tool integrations. No make-shift solutions. Go deep or go wide into your data to gain a more meaningful understanding you can lean on to drive smarter decision-making and better outcomes. Search and explore complex relationships, diagnose causes and uncover connections and dependencies. Enable rapid progress on new use cases or business-critical operations with custom-built applications. Enhance situational awareness to identify risks, opportunities and losses, monitor activity, track events, see historical trends and more. A powerful ensemble of customizable data visualization UI components lets developer teams present any data type in a unified UX. Full-Text Search Implement a full-text, high-performance search in hours. Set facets and custom filters to allow users to refine results and navigate large data volumes. NetworkGraph Effortlessly present semantic data (RDF triples) and complex information networks as intuitive, high-performance knowledge graph visualizations. GeoMap Easily overlay geospatial data onto real-world, interactive maps to satisfy use cases like real-time tracking, alert setting and monitoring of critical information. Timeline Add an interactive timeline dimension to help data users understand complex event sequences and how they unfold over time. Preview the components, explore their features and configuration options and grab our guides for building powerful search applications with FastTrack. Rely on the MarkLogic robust data capabilities, advanced security features and enterprise-grade scalability, high availability and disaster recovery—proven in the most demanding environments.
