Freephone.io offers access to publicly listed free Indian mobile numbers that can be utilized to receive free SMS messages. These numbers are specifically useful if you want to subscribe to a service that requires mobile verification, but you don't need to use your own number. No, you can't create your own phone number in India because all phone numbers are governed and assigned by authorized telecom service providers like Airtel, Jio, or Vi. If you receive a SIM card or number, then you may get the privilege of choosing from an available set of numbers, especially if you need a flashy or premium number. Yes, the procedure of a private call wherein the recipient won't know your caller ID is legally allowed in India. Masking your caller ID for an individual call can be done by preceding the desired dial number with #31#. However, your telecom company and the police can trace it. This facility should be used responsibly. Yes, there is a way of getting a free virtual phone number, and one of the most convenient websites for this is freephone.io. It offers free temporary and public virtual numbers, i.e., Indian numbers, to get SMS for free. These numbers are suitable for short-term purposes like verification. You can get a temporary Indian phone number from freephone.io. The site provides free access to freely listed temporary Indian mobile numbers, which get updated automatically. These numbers are meant for SMS message receiving purposes and are suitable for temporary use like signing up with a website or getting a verification code. If you want to call without exposing your number in India, you can call #31# before the mobile number you are calling. Most smartphones also support an inbuilt facility under "Call Settings" to hide your caller ID for all calls. No, India never has 9-digit mobile numbers. Indian mobile phone numbers are standardized to 10 digits, as per TRAI recommendations. Any number short of a 10-digit number is outdated or inputted incorrectly. Yes, a virtual phone number is legal in India if used according to local telecommunications laws. Virtual numbers are used for privacy, security, and business purposes, but should not be used for illicit activities. A 10-minute mobile number is a temporary number that can be used for a short period, generally for 10 minutes to a few hours. It is used for one-time verifications like receiving an OTP. An actual Indian phone number consists of 10 digits, typically starting with 6, 7, 8, or 9. The number is prefixed with India's country code (+91), like +91 9876543210 when dialed from outside India. Yes, virtual phone numbers are legal in India for business and personal use. They must comply with Indian telecommunication laws and should not be used for fraudulent activities. The phone number 100 is the emergency number for the police in India. It is toll-free and can be dialed to report crimes, suspicious activity, or to reach the nearest police station. A fancy number is a phone number with a special pattern, such as repeating digits or sequences that are easy to remember. These numbers are considered prestigious and are often auctioned or sold at premium prices. No, Indian mobile phone numbers are always 10 digits. If you encounter an 11-digit number, it is likely a landline or incorrectly formatted mobile number. Yes, Internet calling or VoIP services like WhatsApp, Skype, Google Meet, and Zoom are legal in India. However, unofficial VoIP services that evade telecom regulations are prohibited. We currently provide temp numbers for three countries - india, usa, and nepal. We are planning a major upgrade soon and will be adding phone numbers for the following countries - united kingdom, pakistan, bangladesh, and nigeria. How often do you add new Temp numbers ? We add new numbers monthly. Can i use this service for free? Our free numbers you can use free forever. we are providing 7 days free trial also. How many indian number i can buy? You can buy unlimited indian number. I have not received SMS yet, why? Some services send one time password (OTP) as a voice call. If the service makes a phone call to send OTP, we don't store that in our system. Our system only supports SMS OTP or verification codes. Our service supports common SMS verification platforms like Twitter(X), Google, Facebook, Instagram, WeChat, Alipay, and more. We strive to add new phone numbers on a weekly basis so that you can use our service reliably. 1.
