It is desirable to create a new project in a separate folder. Image names do not have to consist only of numbers, you can add short prefixes (for example, date\_01, time\_01). Watch faces created in the editor and on Huami's website should unpack normally. Watch faces from Zepp and those created based on them will not be unpacked. In a set of images for displaying one parameter (for example, images for displaying the day of the week), all images should preferably be the same size. If the size of the images is different, then the first image in the set should be the largest. All new features in this and next release will be tested on the GTR4 and may not work on other models.
