you've lost or misplaced your Galaxy Watch charger, or you're traveling and forgot it at home, you have two options: Use a compatible Qi charging station: Galaxy watches use the Qi wireless charging standard, which means you can charge them with any compatible Qi charging pad or station. Use a Galaxy phone that supports PowerShare: If you have a Galaxy phone that supports PowerShare, you can charge your Galaxy Watch wirelessly using the phone. The following Galaxy phones support this feature: Galaxy S10 and newer, Note 10 & 20, Z Fold 3 and newer, and Z Flip 3 and newer. FAQ The only Samsung watch that comes with a special charging cradle is the Galaxy Fit2. The Fit2 isn't compatible with any other charging method and replacements aren't available from the Samsung store. If you lose the charging cradle to your Fit2, contact Samsung support for help. The charging time for a fully depleted battery ranges from 3 to 4 hours on older models to 2 hours and under on newer Galaxy watches. After fully charging the battery to set up the Galaxy Watch, you don't need to wait hours; on newer models you can charge the device for 30 minutes and get 10 hours of battery life.
