Flavoxate tablet

What is this medicine?

FLAVOXATE helps to relieve spasms in the urinary tract.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- difficulty passing urine
- glaucoma
- heart disease or irregular heartbeat
- intestinal problems
- stomach or bowel obstruction
- an unusual or allergic reaction to flavoxate, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Take flavoxate tablets by mouth. Swallow the tablets with a drink of water. You may take flavoxate with food if it upsets your stomach. Take your medicine at regular intervals. Do not take your medicine more often than directed.

Contact your pediatrician or health care professional regarding the use of this medicine in children. Special care may be needed.

Overdosage: If you think you have taken too much of this medicine contact a poison control center or emergency room at once.
