Lescol ®XL

Fluvastatin is used together with diet to lower blood levels of "bad" cholesterol (low-density lipoprotein, or LDL), to increase levels of "good" cholesterol (high-density lipoprotein, or HDL), and to lower triglycerides (a type of fat in the blood). Fluvastatin is used to slow the build-up of plaque (fatty deposits) in your blood vessels. Fluvastatin is also used to lower the risk of heart complications in certain people with coronary heart disease.

Active ingredient: [Fluvastatin](#)

Fluvastatin Tablet

What is fluvastatin?

Fluvastatin is used together with diet to lower blood levels of "bad" cholesterol (low-density lipoprotein, or LDL), to increase levels of "good" cholesterol (high-density lipoprotein, or HDL), and to lower triglycerides (a type of fat in the blood).

Fluvastatin is used to slow the build-up of plaque (fatty deposits) in your blood vessels.

Fluvastatin is also used to lower the risk of heart complications in certain people with coronary heart disease.

Fluvastatin is used in adults and children who are at least 10 years old.

Fluvastatin may also be used for purposes not listed in this medication guide.

Warnings

You should not take fluvastatin if you have liver disease, or if you are breastfeeding a baby.

Do not use if you are pregnant or breastfeeding.

Some medicines can cause unwanted or dangerous effects when used with fluvastatin. Tell your doctor about all other medicines you use.

Before taking this medicine

You should not take fluvastatin if you are allergic to it, or if:

you have active liver disease; or

you are pregnant or breastfeeding.
