

Astelin

Astelin nasal is used to relieve nasal symptoms such as runny/itching/stuffy nose, sneezing, and post-nasal drip caused by allergies or other conditions. Azelastine belongs to a class of drugs known as antihistamines. It works by blocking certain natural substances called histamines that are responsible for nasal symptoms.

Astelin nasal spray

What is Astelin?

Astelin (azelastine) is an antihistamine that reduces the effects of natural chemical histamine in the body. Histamine can produce symptoms of sneezing, itching, watery eyes, and runny nose.

Astelin nasal spray is used to treat sneezing, runny or stuffy nose, itching, and other nasal symptoms of allergies, in adults and children who are at least 5 years old.

Astelin is also used to treat ongoing nasal symptoms (runny or stuffy nose, sneezing, itching) that are not caused by allergies, in adults and children who are at least 12 years old.

Important Information

Astelin may impair your thinking or reactions. Be careful if you drive or do anything that requires you to be alert. Before using Astelin, tell your doctor if you regularly use other medicines that make you sleepy (such as cold or allergy medicine, sedatives, narcotic pain medicine, sleeping pills, muscle relaxers, and medicine for seizures, depression, or anxiety). They can add to sleepiness caused by azelastine.

Drinking alcohol can increase certain side effects of azelastine. Call your doctor if your symptoms do not improve, or if they get worse while using Astelin. Stop using this medicine and call your doctor at once if you have fast or uneven heartbeats, tightness in your chest, or if you feel short of breath.

Before taking this medicine

Before using Astelin tell your doctor about all your medical conditions or allergies.

It is not known whether this medicine will harm an unborn baby. Tell your doctor if you are pregnant or plan to become pregnant.

Using Astelin while you are breast-feeding may cause your breast milk to taste bitter. If you breast-feed while using this medicine, watch for signs that your baby is not nursing as well. Talk to your doctor about the best way to feed your baby.

How should I use Astelin?

Use Astelin nasal spray exactly as prescribed by your doctor. Follow all directions on your prescription label and read all medication guides or instruction sheets.

Read and carefully follow any Instructions for Use provided with your medicine. Ask
