Cefdinir capsule

What is this medicine?

CEFDINIR is a cephalosporin antibiotic. It treats many kinds of infections including those of the skin, respiratory tract, sinuses, ears, and urinary tract.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- bleeding problems
- kidney disease
- stomach or intestine problems (especially colitis)
- an unusual or allergic reaction to cefdinir, other cephalosporin antibiotics, penicillin, penicillamine, other foods, dyes or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Take this medicine by mouth. Swallow it with a drink of water. You can take it with or without food. If it upsets your stomach it may help to take it with food. Take your doses at regular intervals. Do not take it more often than directed. Finish all the medicine you are prescribed even if you think your infection is better.
