# Procyclidine Hydrochloride tablet

# What is this medicine?

PROCYCLIDINE is an anticholinergic agent. It works by relaxing smooth muscle, which stops muscle spasms. This medicine is used to treat the stiffness, tremors, spasms, and poor muscle control of Parkinson's disease. It is also used to treat and prevent these same muscular conditions when they are caused by certain drugs.

# What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- angle-closure glaucoma
- · high blood pressure
- · heart or blood vessel disease
- · kidney or liver problems
- · mental or mood disorders
- muscle weakness
- ulcerative colitis
- · urination problems
- · uncontrolled movements of the hands, mouth or tongue
- an unusual or allergic reaction to prociclidine, other medicines, foods, dyes or preservatives
- · pregnant or trying to get pregnant
- · breast-feeding
