What is this medicine?

LIDOCAINE is an anesthetic. It causes loss of feeling in the skin and surrounding tissues. It is used to prevent and to treat pain from some procedures, to reduce inflammation, itching, and burning.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- infected, open or damaged skin
- an unusual or allergic reaction to lidocaine, other medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

This medicine is applied to the skin or mucous membranes using finger tips or cotton swabs. It may be applied by a health care professional before a procedure to numb the area. It may also be applied to hemorrhoids for relief of pain. Do not use more often than directed.

Contact your pediatrician or health care professional regarding the use of this medication in children. While this drug may be prescribed for selected conditions, precautions do apply.

Overdosage: If you think you have applied too much of this medicine contact a poison control center or emergency room at once.

NOTE: This medicine is only for you. Do not share it with others.
