Chloramphenicol capsule

What is this medicine?

CHLORAMPHENICOL is an antibiotic or antiinfective. It treats certain types of brain, lung, blood, or other serious infection.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- anemia or other blood disorders
- dental problems
- glucose 6-phosphate dehydrogenase (G6PD) deficiency
- liver disease
- kidney disease
- other chronic illness
- porphyria
- an unusual or allergic reaction to chloramphenicol, other antibiotics or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I take this medicine?

Chloramphenicol capsules are taken by mouth. Take at regular intervals through the day and night (every 6 hours around the clock). Take the capsules with a full glass of water. Take 1 hour before or 2 hours after
