Labetalol Hydrochloride tablet

What is this medicine?

LABETALOL is an alpha- and beta-blocker. It reduces the workload on the heart and helps it to beat more regularly. This medicine is used to treat high blood pressure.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- diabetes
- history of heart attack, heart disease or heart failure
- kidney disease
- liver disease
- lung or breathing disease, like asthma or emphysema
- pheochromocytoma
- thyroid disease
- an unusual or allergic reaction to labetalol, other beta-blockers, medicines, foods, dyes, or preservatives
- pregnant or trying to get pregnant
- breast-feeding

How should I use this medicine?

Take this medicine by mouth with a glass of water. Take your doses at regular intervals. Do not take your medicine more often than directed. Do not stop taking this medicine suddenly. This could lead to serious heart-related effects.

Talk to your pediatrician regarding the use of this medicine in children.

Special care may be needed.
