Levonorgestrel emergency contraceptive tablet

What is levonorgestrel emergency contraceptive?

Levonorgestrel emergency contraceptive is used to prevent pregnancy after unprotected sex or failure of other forms of birth control (such as condom breakage, or missing 2 or more birth control pills).

Levonorgestrel emergency contraceptive may also be used for purposes not listed in this medication guide.

Important Information

levonorgestrel emergency contraceptive will not terminate pregnancy if the fertilized egg has already attached to the uterus.

Ask a doctor or pharmacist before taking levonorgestrel if you regularly use medication for seizures, tuberculosis, or HIV/AIDS. Certain other medicines can make levonorgestrel less effective.

Before taking this medicine

Do not use this medicine if you are already pregnant. Levonorgestrel emergency contraceptive will not terminate a pregnancy that has already begun (the fertilized egg has attached to the uterus).

Levonorgestrel emergency contraceptive is not approved for use by anyone younger than 17 years old.

You should not use levonorgestrel if you are allergic to it.

Ask a doctor or pharmacist before taking levonorgestrel if you regularly use medication for seizures, tuberculosis, or HIV/AIDS. Certain medications can make levonorgestrel less effective as an emergency form of contraception.

Levonorgestrel emergency contraceptive is not intended for use as a routine form of birth control and should not be used in this manner. Talk
