Tadalafil Professional tablet

What is this medicine?

TADALAFIL Professional, sublingual tablets are used to treat erection problems in men. One of the main benefits of Cialis Professional is the heightened sensitivity to the penis. This means that it should take less stimulation to achieve an erection for those individual's suffering from erectile dysfunction, though stimulation must still be present. In addition to the increased sensitivity, men have also been said to experience longer effects with this new formula of tadalafil, setting the response period from anywhere between 38 and 48 hours.

What should I tell my health care provider before I take this medicine?

They need to know if you have any of these conditions:

- eye or vision problems, including a rare inherited eye disease called retinitis pigmentosa
- heart disease, angina, a history of heart attack, irregular heart beats, or other heart problems
