Avanafil & Dapoxetine

What is this medicine?

Top Avana is a new combination ED medicine.

It contains avanafil and dapoxetine (Priligy). Avanafil works similarly to Viagra and helps achieve and sustain an erection. Dapoxetine helps to make erections prolonged.

Avanafil belongs to the same class of ED drugs (PDE5 inhibitors) as Viagra, but has a quicker onset of action. It can start working in as little as 15 minutes.

Studies also show that Avanafil has less side effects compared to Viagra.

What is the most important information I should know about Top Avana?

Follow the directions for using this medicine provided by your doctor. Take your medicine exactly as directed.

The usual recommendation is one pill taken about 30 minutes before sexual activity. It can be taken with or without food.

Do not take avanafil more than 1 time a day. Do not drink too much
