Cycloserine capsule

What is this medicine?

CYCLOSERINE is an antibiotic. Cycloserine kills or interferes with the growth of bacteria that cause tuberculosis. It is usually reserved for patients with tuberculosis who have been unsuccessfully treated with other medicines.

What should my health care professional know before I take this medicine?

They need to know if you have any of these conditions:

- an alcohol problem
- anxiety
- depression
- kidney disease
- mental illness
- seizures (convulsions)
- an unusual or allergic reaction to cycloserine, other medicines, foods, dyes or preservatives
- pregnant or trying to get pregnant
- breast-feeding
